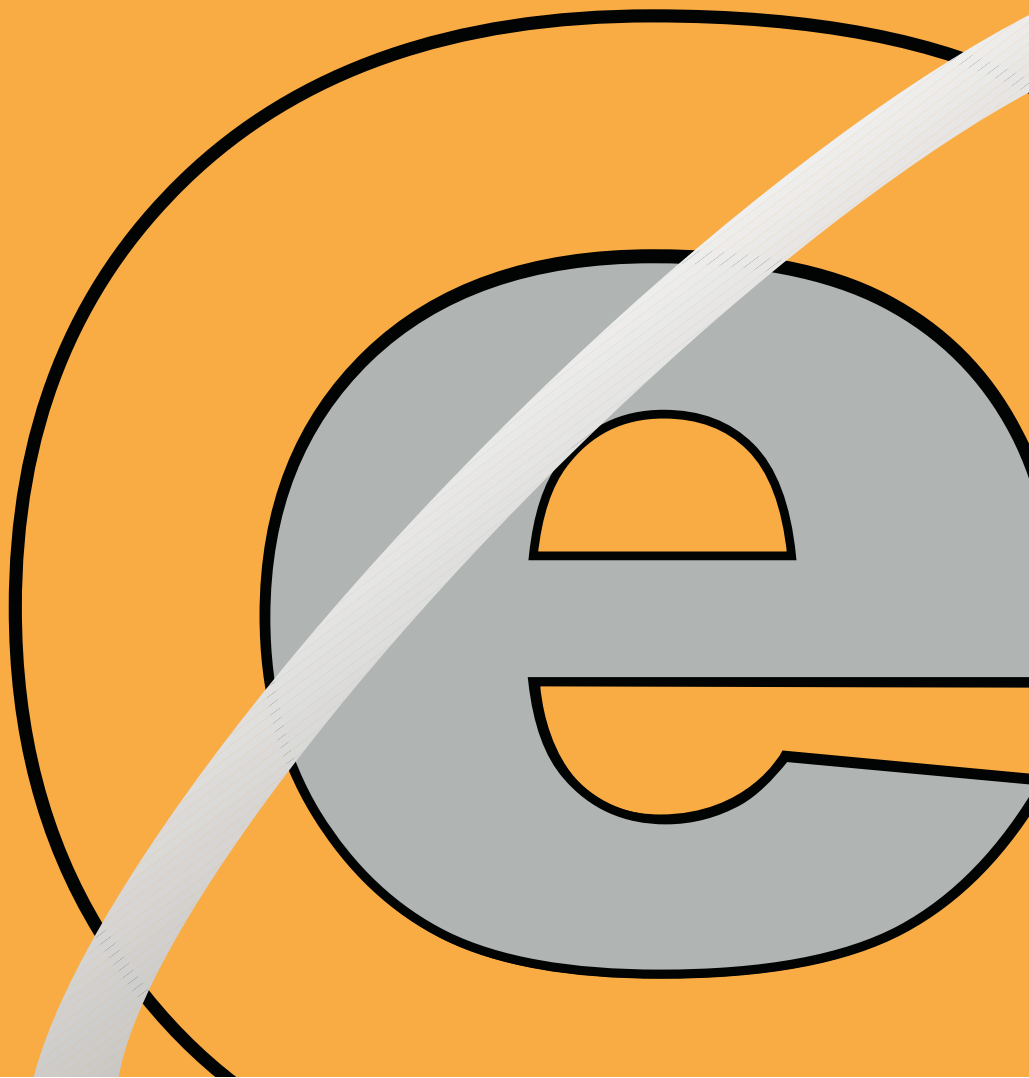
User's Manual

Eguides for GPS Garmin disposals



Garmin installation

1. Connect Garmin to PC
2. Decompress file .zip
3. Copy file .gpi in the directory "Poi", that is available in the navigator
4. Disconnect and re-start the disposal

Notes for users

Compatibility between Eguides and Garmin disposals can be different according to the different models. Audios and images won't be visualized on some disposals.

Where the application is installed

Once the Eguides has been activated, different CATEGORIES will be visualized, among which you can choose.
It is also possible to visualize the points of interest available for ALL THE CATEGORIES

How to search among the points of interest

Once the application activated, press button WHERE YOU ARE GOING, scroll the buttons till EXTRA or MY POSITIONS (according to the model).
By pressing the button, there will appear the title of the installed guides

Available informations

Once the choice is made, a list of the points of interest situated around you will appear.
By selecting a point it will be possible to obtain:
- description text
- map
- navigation
- audio, if available (by pressing the triangle located to the top left)
- visualization of a map in the region
- visualization of an image (if available)

Users advice

By choosing the button OTHER there can be visualized text information disposed also on more pages.
By pressing the button GO! the navigator will lead to the chosen point.
The distance is calculated only if the GPS finds itself outside and is receiving the GPS signal.

To exit the guide and go back to navigation : press button BACK till it goes back to navigation.
To look for a point of interest in the guide based on the destination locality or the GPS point where you are positioned, select button NEAR from main menu.
